

Eye on Ideas: Tap beer at table

Posted: Oct. 9, 2004

It's more elegant than a keg, and infinitely more accessible. The Table Tapper, a clear, 3-foot-high, narrow vessel, allows beer-loving hosts to dispense 116 ounces of beer at a time. The no-drip tapper can be filled from a keg or bottles. It also can be used to dispense soft drinks at kids' parties. Engineered to keep drinks cold, it features a plastic tube made with a polycarbonate mixture, the same material used in bulletproof shields. Priced at \$99 (look for a holiday special of \$89 next month) at www.tabletappers.com.
